Notes to the Financial Statements

1. Accounting policies

Basis of accounting

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

The principal accounting policies of the company remain unchanged from the previous year and are set out below.

Turnover

The turnover shown in the profit and loss account represents amounts invoiced during the year, exclusive of Value Added Tax.

Turnover comprises management fee income, administration fee income, lettings fee income, tenancy continuations, commission and other Income. Management fee revenue is recognised on receipt of rental payments in to clients' accounts. All other income is recognised on delivery of the related service.

Fixed assets

All fixed assets are initially recorded at cost.

Depreciation

Depreciation is provided evenly on the cost of other tangible fixed assets over their expected useful lives.

Leasehold Offices	- Length of lease straight-line
Computer Costs	-15% to 25% straight-line
Fixtures & Fittings	-10% straight-line
Motor Vehicles	-20% straight-line

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more tax, with the following exceptions:

Provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacement assets are sold.

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.
